MATH 401: WEEKLY ACTIVITY/REFLECTION LOG

Name: 

Date: 

School: 

Subject/Period: 

Activities: Briefly describe what you did this week.

Student Activities: Comment on student interactions in the classroom, especially with respect to: (1) learning styles, (2) giving feedback to teacher (you or cooperating teacher), (3) working with other students, (4) communicating and reasoning mathematically, (5) problem solving strategies used, and (6) their disposition toward math.

Teacher Activities: Comment on your (or your cooperating teacher’s): (1) planning & use of a variety of resources other than the textbook including manipulatives & technology, (2) assessment techniques including questioning, (3) adapting to a variety of student learning styles, (4) motivational techniques & strategies, (5) discipline techniques and strategies, (6) ways of engaging students in problem solving, and (7) ways of helping students make connections.

Need to Change: Describe something that you did that, if you had the chance to do it again, you might do differently. Why would you change it and how would you do it differently? What surprised you regarding student reactions?

Reflection: What conclusion(s) have you drawn from your experiences this week? Do you specifically see the NCTM 2000 Content & Process Standards in action?
